meditech  
systems limited

# WELCOME TO OUR NEW AIRWAY MANAGEMENT CATALOGUE

Meditech Systems Quality Accessories for airway management

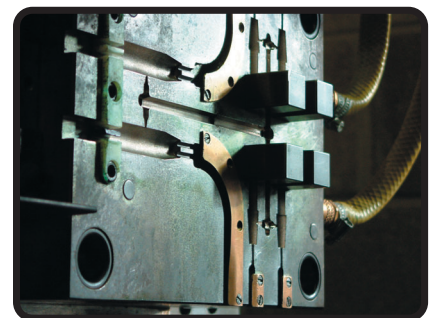

**M**editech is a well established British based manufacturer which has been manufacturing anaesthesia now launched a new range of anaesthesia and respiratory products for a number of years. previously we have only offered these products to Trade customers on an OEM basis; but have now decided to launch the **AIRWAY** range. The **AIRWAY** range offers value for money without compromising on quality and are designed to meet the high quality standards of each market.

Cleanroom assembly

## QUALITY

All products carry the **CE** mark  
EEC DIR 93/42/EEC

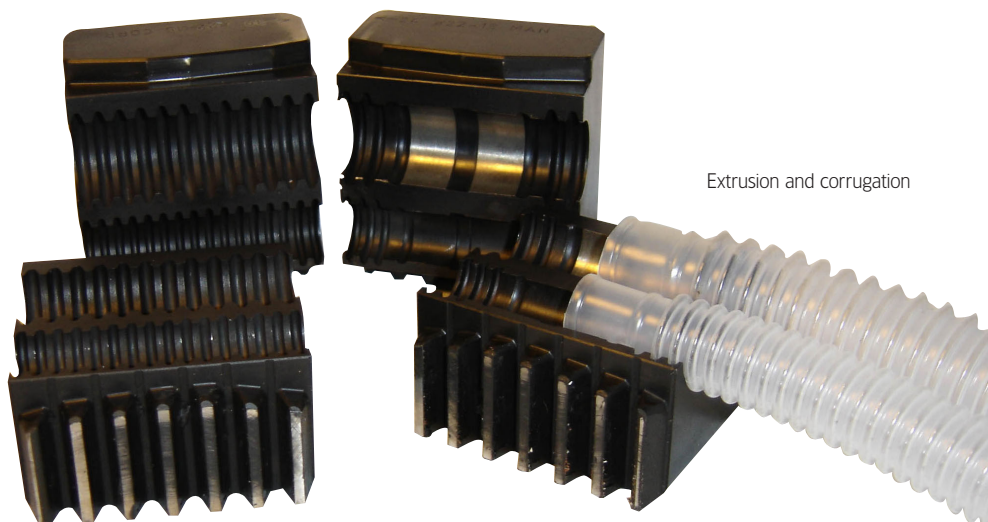

Injection moulding

# CONFIGURE

Custom design and quotation software

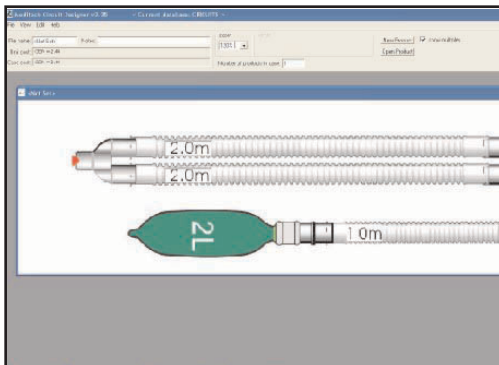

Intuitive, user friendly software which allows you to create your own custom circuit and get a price immediately

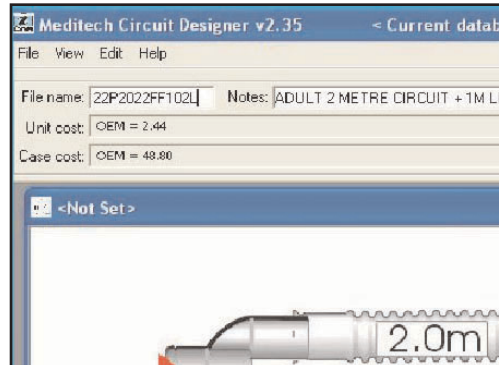

**1** Using the red link arrows you can activate the automatic size recognition which searches components for correct fitting. One click on the component required and it is added to the circuit. Price is being calculated as you build.

**2** Choose the component you require from the list of compatible components. Click on your required component and it is added to the design, still calculating the cost as you continue to build your design.

**3** Once the design is complete. You enter your unique reference number and export it to Meditech via print, email or mobile phone picture export. We will then build your sample for trial use.

**4** The program holds all standard designs on file, allowing an automatic search to check if your design has already been created. If previously created your design will be available from our stock. new customer designs turn around in days.

## CONFIGURE

Developed by ICAN Software Ltd

Configure is available to all Meditech dealers along with a full comprehensive product offering in anaesthesia and respiratory products. contact customer service for your installation CD:
